

Invitation webinar

Bioenergy retrofit of facilities in the CHP and heat-only sector

The webinar disseminates knowledge and experiences of feed-stock conversion in the sector. It gives an overview of options for bioenergy retrofitting in said industry, as well as insight in the conditions under which each type of bioenergy retrofit is feasible.

Target groups: Actors and stakeholders in the CHP and heat-only sector.

Decision makers at all levels.

How to join? Use the link below to sign up. You will then receive a link to the meeting some days in beforehand. (free of charge):

Agenda

Time	Topic	Speaker
12.50 – 13.00	Tech check	-
13.00 – 13.10	Welcome and introduction to the BIOFIT project	Göran Gustavsson, <i>Regional Energy Agency of Southeast Sweden</i>
13.10 – 13.25	Burner technologies, bioenergy conversion to wood powder, prerequisites and driving forces	Björn Forsberg, <i>WTS</i>
13.25 – 13.40	The case Lantmännen Åhus, SE: Grain dryer, 6 MW gas to wood powder/gas	Representative from the reference
13.40 – 13.55	The case Stalowa Wola, PL: Steamboiler CHP, 8 times 16.5 MW coal to biomass	Main contractor of the reference
13.55 – 14.10	Utilizing present equipment for sustainable fuel conversions	Johanna Lindén, <i>Petro Bio</i>
14.10 – 14.25	Burner technologies and other considerations when converting to bio-oil, prerequisites and driving forces	Stefan Roslund, <i>Consultant, Semix Consult AB</i>
14.25 – 14.40	"Policies and recommendations for decarbonisation of the CHP and heat only sector".	Gustav Melin, <i>Swedish Bioenergy association, SVEBIO</i>
14.40 – 15	Q&A and wrap-up	All
